TRIGGE, 1671.  
An Astrologo-Physcial Discourse.

**T**HAT the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humors, is caused by the various and different Aspects and Positions of the Stars is even by Hippocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage for the sick;

Let the { Sanguine      } bleed the ☽, or ☐.  
Cholerick      } ☽, or ☐.  
Phlegmatick      } being in ♈, or ☊:  
Melancholy      } ☎, ☊, or ☐.

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven:

It is good to purge with Elixaries, when the ☽ is in ☽; with Pills, when she is in ☐; with Potions, when in ☎, because then posited as before directed.

Vomits are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them; as when the Distemper bath above the stomach; it being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☽ is in ☽, ☐, or ♈, in any good Aspect of ☽, ☽, or ☎.

Clysters are most conveniently administered, when the ☽ is in ☽, ☊, or ☐, posited as before.

Good to stop Fluxes, or Rheumes, or Issues, when the ☽ is in any of the Earthly Signs, viz. ☽, ☐, or ☎; of which experience is a valuable witness.

Very proper to Bath, when the ☽ is in ☽, ☎, ☊, or ☐, in Aspect of ☽, or ♈.

Convenient to cut Hair, the ☽ being in ☎, ♈, ☊, or ☐, increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be esteem it an Honour to be made amends with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

TRIGGE, 1671.

# An Astrological Description of the Four Seasons of the Year, 1671.

## i. Of the Spring.

The Spring Season, or *Vernal Equinox*, beginneth at that time the Sun toucheth the first point of *Aries*, which this Year happens on *March the 10<sup>th</sup>*. 51.  
*ante Meridiem*; according to the Astronomical Tables in the *Doctrine of Nativities*. The Schem whereof, as it is in the Meridian of the most famous City of London, is as followeth.

## TRIGGE 1671.

This Season extendeth it self from the beginning of  $\textcircled{V}$ , to the beginning of  $\textcircled{S}$ , the Sun passing through all  $\textcircled{V}$ .  $\textcircled{S}$ . and  $\textcircled{I}$ , maketh the Spring Quarters. For Nature, it is principally hot and moist; and is therefore very aptly resembled to Youth, to the Sanguine Complexion, and to the Element of Aire, as enjoying the same temperament.

The Diseases commonly happening in this Quarter, are Feavers, Small Pox, Leprosies, Itch, Pluresies, sore Eyes, Astmabs, voluntary Bleeding: With many other Sickneses proceeding from a corrupted Mals of Blood.

In the last year (when  $\textcircled{h}$  was in the Ascendant of the Vernal Figure) it varied from it's natural signification, as you may remember; I then predicted Agues to reign among Men and Women in that Quarter; which how true it fell out, our experience is a grand Evidence; there being then no Disease so eminently afflicting Humane kind, as your Aguish Distempers.

— I hope the Learned Dr. More, will not presume I consulted with Devils, or Demerolatry (as he saith all Astrologers do that foretellet any thing truly,) in this prediction; syth I can assure him it is always so when  $\textcircled{h}$  is in the Ascendant of a Revolution of the World; as himself may experience without any of those black devices, as he most unreasonably supposes. I will not question here how becoming so great a Physiologher, such mean Exceptions against Astrology are; as when that he cannot avoid the truth of Experience, to shift off the certainty of the Prediction to the Devil &c. Because I hear the Learned Doctor hath an Answer preparing for him, to all that he hath written against the Celestial Science; as also to some other things which perhaps are likely to be proved every way as unsound,

sound, and possibly as unservicable to the advancement of the most Noble kinds of Learning.

To avoid conjuring Words, I mean terms of Art, (for that's the noise which frighteth our Antagonists, and makes them foam out their angry Zeal against the Stars, and Astrologers : I shall (in brief) give you the significations of this Vernal Ingress. It imports Honour and Advantage to Kings and Nobles, and unto Magistrates of all sorts ; as also to the Church and Reverend Clergy thereof: Gives them Victory over their Enemies and Opposers ; many new and wholesome Laws are made and obeyed : *Fanatical* and *Heretical* People will appear, it is true, but they meet no such encouragement as they may expect : Many of them converted from their folly and madness, they beginning to find by Experience, Obedience to be better than Sacrifice. Many false pretenders to Science do now appear, and are endeavouring to cozen the World under pretence of Alchimy, and the more secret mysteries of Nature. It is pity so Noble an Art as Chymistry should be the Patron of Quacks or Cheats. I could wish the Learned and Deserving Operators were Incorporated, that they might not lye in common, to be intrench't upon by every pitiful pretender ; who if he have gotten but a twopenny Crucible, and can tell how to melt down Lead to make Bullets of, thinks by virtue hereof he is capacitated at the next Leap, for the Lapis Philosophars, or the Elixorum, or some universal Pill, a Panacea, &c. at the least ; when God knoweth those noble Essences, and excellent things that are to be obtained be the Chymical Art, may be somewhat to cate for any thing those confident sort of people know of them.

The Female Sex is likely to be very healthful, and

to be had in good esteem, and honoured in this Quarter; and they will be apt to train up their Children to Goodness, and in Devotion, and to keep their Families in good order and quiet; shewing them very apt Examples in themselves.

The Country-man or Farmer meets encouragement for his Pains, in the following his useful Vocation; finds no hard Season to contradict his hopes; the Earth yieldereth its Increase happily, and he may expect abundance of Hay, &c and that to prove excellently good and sweet, and all other things the Spring affords the same.

### 2. Of the Summer.

**T**He Summer Solstice always begins where the *Vernal Equinox* endeth: It takes its Name *Ab Estu*, because of the very great heat which this Season always affordeth, or else it may be termed Summer, *Quasi Sunne Mehr*, according to the Germans: For then we have *Pius Solis*, a greater Portion, and longer stay of the Sun with us, than at other times of the year. It consisteth of that quantity of time, in which the Sun is running through the Signes of *Cancer, Leo, and Virgo*, it is naturally hot and dry, and assimilated to Fire among the Elements, to Choller among the Humors; to Manhood in Humane Race. This Quarter now begins on June the 11th. day, at 1 h. 58 afternoon, and in many things is agreeable to the good significations of the Spring Quarters. Yet I fear an Apparition of several dreaming Euthusiasts in this Quarter, because the ♀ is in □, ♂ and ♂. and ♀ are conjoyned in the 9th. of the Figure. Many Sorrows and Imprisonments befall divers eminent Merchants and Traders both at home and beyond Sea; the Kings Bench and Fleet fills space; see you not ♀, *In domo carceris*, and the Lord thereof in ♂. ♂. Lord of the 8th, from the 12th, I say, it is a dolorous Position to all

all such as in this Quarter cannot keep their credit, or shall go to Prison either for Debt or othe wile ; and denotes, not only hardship and misery while they continue there, but that may shal die in Prison.

The Diseases that at this time are principally reigning in mens bodies, are Impothumes, Pestilential Feavers, Jaundies, burning Agues, Madness, Inflammations with all other weaknesses proceeding from Choller. Those Persons that are Chollerique, are at this time most unhealthy : And the Flegmatique Person enjoyes the greatest freedom from Sickness ; because to this, the powerful heat of the Season dryes up the superfluous Moisture that accustometh to discompose him ; and to the other exhales too potently the Radical Moisture, leaving the Crasis exceeding siccos and dry ; and consequently apt to generate any the foremention'd Diseases. Extremity of Heat, we see cleaves the stoutest Trees ; nay, the Earth it self : and must therefore rack and tear mens bodies that are aptly disposed to its Fury, as is the Chollerick Persons.

### 3. Of Autumns.

**T**He Autumnal Equinox beginneth always when the Sun entrieth the Celestial Balance, viz *Libra*, and continueth all the time he passeth through *Libra*, *Scorpio*, and *Sagittary* ; and this year falls out to be on September 12. 16. 37 h.. P. M. or Afternoon.— *Virgo* ascends the Horoscope, *Canda Draconis* is therein ; and  $\delta$  and  $\eta$ . in  $\delta$ . from the ascendant, and seventh Angles. 'Tis a far more rugged Position, than either of the former Quarters presented us withal, and the actions thereof will be suitable : But you being likely to be better informed of the effects thereof, by such as have larger room allotted them ; I shall forbear to descend to particulars of that nature in this place ; only know, that the Autumnal Season is a season Cold and Dry, and is very

pertinently and fitly resembled to the humour of Melancholly ; to the Earth among the Elements : and to the old declining Age of Mankind.

The Diseases that are principally observed to torment and discompose men in this Quarter, are Pains in the back, darkness of sight, retention of Urine : also Cankers, Hemorrhoids, Piles, Fistulas, &c. with all other humors proceeding from that destructive Humor of Melancholly.

#### 4. Of the Winter.

**T**He Winter or *Hyemnal Solstice* always commenceth when the Sun enters the first minute of the Tropical Signe of *Capricorn*; and continueth all that time he is transiting through the Celestial Signs of *Capricorn*, *Aquarius*, and *Pisces*. And the *Annual Circle* being thus finished, the Sun mounts the Celestial *Aries* again, beginning the Spring of a succeeding year; according to the Poet :

Bright Phœbus running his Ecliptique Ring,  
Doth make the Autumn, Winter, Summer, Spring.

Winter this year inchoates on December 11. day, at 4. 31 h afternoon; ten degrees of Cancer ascends on the Eastern Finitor, and the ♀ Lady thereof is in 8. h. from the 10th. and 4th. Angles. It's significations are not much unlike those of the *Autumnal Figure*; but because it is now but a fortnight, or little more, before a new year begins, I will leave my Judgments thereof to the succeeding year.— The Season is cold and moist, Rain being more frequent now, than at other times; because the Starrs call'd Kesil, or Orion, now arise with the Sun, gendring Tempests, Storms, or Rain, &c. sometimes by the various Configurations of the Planets, this general inclination is over-born; whence we have Frosts, &c. but of it self it is of this Nature, and not otherwise. Hence 'tis resembled to Phlegm among the humors, and

to water among the Elements : and to the last, oldest  
descript Age of Man.

The Diseases peculiarly incident to this Quarter, are  
the Tooth-ach, Scals, Fluxes of blood by the inferior  
Parts, Pustes in the Face, Delusions and Rhewms, Pal-  
sies, Gours, and all other Diseases proceeding from cor-  
rupted Fleagme. And thus much for the four Quarters  
of the Year.

### *Of the Eclipses that happen in the Year, 1671.*

**W**E the Inhabitants of the Earths Opac <sup>u</sup>Globe, shall  
find the Luminaries of Heaven fourtimes in this  
year obscured from our sight, twice the Sun, and as often  
the Moon. The *Eclipses* of the Moon will be total and cen-  
tral ; but those of the Sun, small, and hard to be percei-  
ved. I shall mention them in order as they happen.

The first will be an *Eclipse* of the Sun, on the first day  
of *March*, and happens about our two of the Clock in the  
Morning ; and is therefore invisible as to us ; but where  
it is most visible, is scarcely perceptible, therefore I will  
say no more thereof here.

The second is a defect of the Moon, and happens on  
the fifteenth of *March*, near our eleven a Clock before  
Noon ; and unto our Antipodes will appear an *Eclipse*  
both total and central. It is celebrated in 5. degrees of  
*Libra*. Some great Princess or Queen in the Westers  
World yields to the Grave, whose Death will be infi-  
nitely lamented by many, her Goodness, Virtue, and  
Piety, all flying to Heaven with her. *Libra* is truly cal-  
ld *Signum justiciae*.

The third *Eclipse* is of the Sun, and happens on *August*  
the 24th. at a little past eight a Clock in the Morning.  
But the defect is so small and inconsiderable, that it will  
scarcely be perceived by any common eye. Yet the  
Learned Artists by the assistance of good Instruments  
may obtain, not only a sight thereof, but the exact quan-  
tity of the Obscuration or Defect. Howbeit, it will be  
with

## TRIGGE, 1671.

with trouble to him, it being so small and minute in it self.

The fourth and last Eclipse is of the Moon, and happens on the eighth day of September at 6. h 40. m P.M. or afternoon. It is likely to shew a great Eclipse: it will be both visible, total, and central. Some Great Lady, or eminent Female Personage, it bodes great affliction unto; whether by Imprisonment, or some sudden Catastrophe of Honour, or Death, I cannot exactly say, the *Eclips* is in the twelfth Angle of Heaven in 26 degrees of *Pisces*: the place represents Dolors, Canceration, &c. It may be that restraint may be signified. h. Lord of the 10<sup>h</sup>. is in ♈ 0°. and in the 12<sup>h</sup>. at the same time; it may as well be Deprivation of Honors. The ♉. is Lady of the 4<sup>h</sup>. and in ♈. of ☽. Lord of the 6<sup>h</sup>. it may also prove a sickness unto Death. 'Tis hard to tell which of these it shall be; for none but those endued with Inspiration divine, can point at the very particular thing; but certainly one of the three, or somewhat very like them will hereby be signified. And time must acquaint us with which —— And thus much for my Discourse of *Eclipses*, as also for the whole Year.

*Go now, my Book, unto the World, and tell  
Them what's to come, be it or ill or well.  
Let Fellons fear! thy Message is Divine;  
And the most Lib'ral of the Seven doth shrine  
Thy Youthful face! thou'lt many a noble Friend  
Will welcome thee. Here therefore put*
